

DHT (Humidity and Temperature sensor)

1 - GPIO connector pin 1
2 - GPIO connector pin 3
4 - GPIO connector pin 6

Connect with Arduino uno :

Code:

DHT11sensor

```
#include <DHT11.h>

dht11 DHT11;

#define DHT11PIN 2

void setup()
{
  Serial.begin(9600);
}

void loop()
{
  Serial.println("\n");

  int chk = DHT11.read(DHT11PIN);

  Serial.print("Read sensor: ");
  switch (chk)
  {
```

```
    case DHTLIB_OK:
      Serial.println("OK");
      break;
    case DHTLIB_ERROR_CHECKSUM:
      Serial.println("Checksum error");
      break;
    case DHTLIB_ERROR_TIMEOUT:
      Serial.println("Time out error");
      break;
    default:
      Serial.println("Unknown error");
      break;
  }

  Serial.print("Humidity (%): ");
  Serial.println((float)DHT11.humidity, 2);

  Serial.print("Temperature (oC): ");
  Serial.println((float)DHT11.temperature, 2);

  delay(2000);
}
```
